

New Cash Pay Fee Structure for 30-Minute Massage *In Conjunction with Chiropractic Adjustment:*

Many of our BCBS clients have enjoyed a 30-minute massage as part of their chiropractic treatment. Unfortunately, BCBS chose to discontinue this benefit starting in January, 2009. Many of you benefit greatly with a massage in conjunction with a chiropractic adjustment, so we have developed our own fee structure for this service on a cash-pay basis.

If you schedule a massage the SAME DAY as your chiropractic adjustment, we are able to consider it part of your treatment and will reduce the price from our regular massage schedule for you. This is open to all of our insurance and cash chiropractic patients.

As of January 1, 2009, when service is provided IN CONJUNCTION (same day) with a chiropractic treatment, cash-pay massage prices will be:

- 30 minute \$29.00 + \$.58 tax = \$29.58

- 60 minute \$54.00 + \$1.08 tax = \$55.08

Please note you will still have to pay your usual co-pay or deductible for your chiropractic adjustment, along with the massage fee at the new, reduced pricing as noted above. All fees must be paid at the time of service. If you participate in a flex plan, your massage fee can be submitted to your flex account.

If you have any questions about this BCBS benefit change and the new cash-pay fee structure in conjunction with your adjustment, please call our office for details.
